### Passion

I am passionate about quality lighting. Over the past 20 years I have pursued that passion in the fields of energy management, electrical engineering, education, lighting sales, and lighting design. I am now exuberantly integrating this medley of experience into a new consulting business: **Envision Lighting Design, LLC.**

### Philosophy

**ENvision Lighting Design engages with the built environment to ensure an entertaining, enjoyable, and enduring illuminated world.**

You bring your vision to light. We bring light to your vision.

Envision Lighting Design offers full service architectural lighting consulting services. We bring a background in architecture and engineering plus an understanding of lighting technology and psychology to the design team. We offer an unbiased perspective - we do not sell light fixtures. Our goal is the same as yours: to create beautiful, usable, comfortable spaces. We provide sustainable solutions that will reveal the most important parts of the design without drawing unnecessary attention to the lighting.

**Lighting Design Services** can be tailored to meet the size and budget of your project and may include: schematic lighting design and budget preparation, lighting mock-ups and evaluation, specifications for lighting fixtures, lamps, and lighting controls, conceptual lighting control documentation, lighting measurements, light level calculations, and/or energy calculations. Design development through construction documentation of lighting designs may also be provided. Construction administration services are available, including review of submittal drawings, creating punch lists, directing installing contractor(s) on focusing of adjustable lights, and setting dimming presets.
