

ENVISION LIGHTING DESIGN, LLC

ENLIGHTEN. ENHANCE. ENJOY.

About Us

We love light! Our lighting is less about fixtures and footcandles and more about the feeling it evokes. We begin every design with vision. Our goal is the same as yours: to create beautiful, comfortable, sustainable solutions. We apply the visual and non-visual qualities of light to our designs to define space and impact people.

Lighting is ...everything.

Envision Lighting Design, LLC is a State of Missouri and City of St. Louis certified WBE.

Your Project

Lighting design and consulting services can be tailored to meet the size and budget of your project and may include:

- budget preparation
- lighting mock-ups and evaluations
- lighting measurements and light level calculations
- lighting controls design
- specifications of luminaires
- energy calculations

Construction administration services are always recommended, including review of submittal drawings, creating punch lists, directing installing contractor(s) on focusing of adjustable lights, and setting dimming presets.

Our Tools

In the implementation of design and technical skills, the ELD team employs the following tools:

- AGI Lighting Calculation Software
- AutoCAD
- Autodesk Revit Suite
- Bluebeam Revu Standard
- Adobe Photoshop
- Microsoft Office 365
- Asense Lighting Passport Pro – spectrometer and light meter
- Sylvania DS-3050 Light Meters

Our team members currently hold the following certifications and memberships:

- MIES
- Associate IALD
- USGBC, Missouri Gateway Chapter
- WILD
- Lighting Certified (LC)
- LEED AP BD+C
- Professional Engineer (state of Kansas)
